

Conklin **AgroVantage**[®] *Lawn & Landscape System*

Research

Conklin Company, Inc., Shakopee, Minnesota, conducted significant research in the development of Feast[®] Premium Plus[™] 28-0-0 SRN (slow release nitrogen) for residential and commercial turf grass fertilization. The photo above demonstrates some of the trials in progress.

Results

The lawn on the left in the photo above demonstrates the kind of results that homeowners demand. Conklin's lawn and landscape system provides sound nutritional technologies to green up turf grass quickly and provide long-lasting results. Turf grasses exhibit dark green color and greater plant health with more resistance to environmental stresses.
