

Maximize your yields with Feast[®] micro and secondary nutrients

Essential secondary and micronutrients help crops achieve genetic potential - Once you have your AgroVantage soil and/or plant tissue analysis results and recommendations, choose from a full line of Feast Micro Master chelated secondary and micronutrients to balance your soils' and/or plants' deficiencies. These nutrients are designed for co-application with starter or foliar fertilizers.

All of our formulations are unsurpassed in consistency, purity and nutrient availability, and are either 100-percent chelated using EDTA chelating agents (to resist soil tie-up and provide universal compatibility) or are complexed to provide ideal physical characteristics for ease-of-handling.

- Five to ten times more efficient than inorganic sources
- Economical, effective, and easy-to-use
- Compatible with most fertilizers

■ Complexed Boron - 10%

- #38810 Single 2.5 gallon
- #37143 Two jugs (2.5 gallons each)
- #37135 30 gallons
- #37473 250 gallon mini-bulk
- #38980 Bulk

■ Chelated Calcium - 3%

- #38828 Single 2.5 gallon
- #37150 Two jugs (2.5 gallons each)
- #37168 30 gallons
- #37481 250 gallon mini-bulk
- #37490 Bulk

■ Chelated Copper - 7.5%

- #7757 Single 2.5 gallon
- #7716 Two jugs (2.5 gallons each)
- #7724 30 gallons
- #7732 Bulk

■ Side-Kick - 0-0-25 w/17S

- #38711 55 gallon drum
- #38729 220 gallon mini-bulk
- #38737 Bulk (3,900 gallon maximum)

■ Chelated Iron - 4.5%

- #7450 Single 2.5 gallon
- #7419 Two jugs (2.5 gallons each)
- #7435 Bulk

■ Chelated Magnesium - 2.5%

- #38836 Single 2.5 gallon
- #37176 Two jugs (2.5 gallons each)

■ Chelated Manganese - 6%

- #7559 Single 2.5 gallon
- #7518 Two jugs (2.5 gallons each)
- #7526 30 gallon
- #7562 250 gallon mini-bulk
- #7534 Bulk

■ Chelated Zinc - 9%

- #7658 Single 2.5 gallon
- #7617 Two jugs (2.5 gallons each)
- #7625 30 gallon
- #7666 250 gallon mini-bulk
- #7633 Bulk

“Prior to the 2001 growing season, Conklin’s technical staff had the opportunity to review World Record Corn Growing Champion Francis Child’s soil test results. His tests showed a deficiency in boron, a secondary nutrient that he hadn’t used on his previous record crops. When Francis applied Conklin’s boron product, his yield exceeded 400 BPA for the first time ever, setting the world-record corn yield!

– Tim Carlson, CCA Research Agronomist
