

## Grow your knowledge and enhance your yields.

What happens when you link commitment to quality products, years of field testing and a dedication to improving the lives of our IBOs and customers? You get the practical education component of the Conklin AgroVantage system. Our goal is to provide high-quality, ongoing training that is as effective as our products, and which helps our growers make the most profitable decisions.

### Conklin training covers how to:

- Utilize basic plant nutrition and soil fertility to positively impact your farm yield average.
- Optimize the potential of a complete soil-testing program from a nationally recognized, independent lab.
- Compare and contrast different types of fertilizer to identify what performs best with your soil type.
- Boost yields with secondary and micronutrients.
- Increase nitrogen efficiency through slow-release nitrogen fertilizer.
- Enhance germination and emergence with seed germination aids.
- Select the adjuvants and wetting agents that benefit your operation most.
- Stimulate plant growth with plant growth regulators.
- Maximize the quality of forage with silage and hay inoculants.

### ■ Pro Ag I

Pro Ag I provides the foundation for Conklin's agronomic approach. It introduces you to Conklin's AgroVantage products and system and helps you squeeze extra profit from every acre.

### ■ Pro Ag II

Pro Ag II delves even deeper into soil analysis, plant fertility and foliar feeding. Successful completion of Pro Ag I is required to attend.

To schedule your training, contact the Conklin meetings department at 952-496-4253

**“Many growers tell me that attending Pro Ag training makes them \$10 - \$15/acre their first year, even if they only make one or two changes in their crop management system.”**

**– Rod L., Iowa**

**“Even after taking hours of college soil classes, the common-sense approach I learned at Pro Ag II training has given me a better grasp of soil fertility. By understanding the differences in fertilizer quality and how to read between the lines of my soil tests, I'm getting more out of my crops.”**

**– Carson K., North Dakota**

Your Conklin Independent Business Owner is:
